

LUND UNIVERSITY

Joint Faculties of Humanities and Theology

Department of educational sciences

Division for higher education development (AHU)

Course description

Thematic focus: Digital Technology in your Course and Programme Design

General information

The thematic workshop series “Digital Technology in your Course and Programme Design” is open to teachers and staff with teaching assignments at Lund University, with a particular interest for directors of study, programme leaders and directors, or anyone involved in the design of first or second cycle courses at LU. It is intended to help you to think critically about the use of digital technologies to support teaching and assessment, and to support discussions in your teams about whether, when, and how to include digital tools to support teaching. The course is comprised of three seminars and some online material. There is an optional assignment of one and a half higher education credits if you wish to complete it.

For this course, we are assuming that the purpose of technology in teaching **is to improve the educational experiences of both students and teachers**. The workshops encourage you to consider this in a strategic way, to ensure that your current use of digital tools is achieving what you want, and to see if there are any gaps you might like to fill.

Learning outcomes

At the end of this course, you will be able to

- decide whether to use digital technologies in your programme or course
- decide which digital technologies will be effective in enhancing your programme or course
- prepare a short reflection on your approach which can be added to a teaching or promotion portfolio (optional)

Workshops outline

The series is designed to be easy for busy colleagues to participate in. The material for the series is mostly online, with three short workshops which give the opportunity to share ideas across programmes and faculties.

The language of the series is English. There is no charge for participation.

There will be three face to face workshops.

Session 1: introducing the reasons for using digital tools in programme and course design.	Friday 3 March 2023 10:00–12:00
Session 2: reviewing the online work and considering practical steps	Friday 24 March 2023 10:00-12:00
Session 3: sharing examples, practical ideas and discussion about further professional development and portfolios	Friday 28 April 2023 10:00-12:00

Between the workshops you are invited to work through around 3 hours of online activities in Canvas which will help you to take practical steps towards making decisions about the use of digital tools.

Entry requirements

The workshop series is open to employees at Lund University.
