

LU Case Day 2020, 16-17 April

- *Scaffolding Active Learning by Digitalization*

Invitation by Lund University Case Academy (LUCA)

Welcome to the 7th LU Case Day. We invite engaged teachers, researchers, and students who all generously want to share experiences and reflections connected to the case pedagogy. The theme of the 2020 conference is **Active Learning and Digitalization**.

Register here: <https://sunset.artologik.net/lu/Survey/27569>

The conference includes presentations from the participants, interactive sessions, demonstrations and group discussions. The goal of the conference is to inspire and share ideas on how elements of active learning and digitalisation can be used in your own teaching.

Digitalization is promoted as an important part of modern university education, and it can be used for distance learning as well as to enhance classroom active learning and assessment. Closely connected to active learning is the use of the learning spaces. The theme for April 16 is digitalization and active learning whereas April 17 will mainly be devoted to the physical learning spaces for active learning and the use of case method.

If you have experiences that you are willing to share during the days, please inform us when you register for participation.

Possible themes for these short summaries could be;

- Opportunities and challenges with digitalization in relation to active learning
- The physical space as an enabler for active learning
- The changing role of the 'active-learning teacher' in various learning spaces including digitalisation
- Digitalization as a promotor of intrinsic motivation for engaging students' learning
- The use of digitalization as a source of information to develop and improve teaching
- Challenges and advantages of digital assessment
- Other practical experiences of new, or different, approaches to case teaching and/or active learning (not necessarily digital!)

Conference venue and time: Health Science Center, Baravägen 3, Lund, room C333 (April 16) and room C315 (April 17); April 16 13:15-16:30 and April 17 9:00-12:00; practicalities, and detailed agenda will be shared mid-March.

All the best from the organizing team

Joakim Kembro (Genombrottet, LTH); Ulf Ramberg, Ola Mattisson and Mats Urde (LUSEM); Christina Gummesson and Gudrun Edgren (MedCUL, M).

LUCA – Lund University Case Academy was formed as a network across faculties in February 2012 to promote case-based student active learning. It was started by a group of teachers from the Faculty of Engineering LTH, School of Economics and Management (LUSEM) and the Faculty of Medicine, who share an interest in case-based methods. These include the Harvard case method, today used at LUSEM and the Faculty of Medicine, project-based learning, used in LTH, and problem-based learning used in the Faculty of Medicine. LUCA is interested in widening the participation in the network to more teachers and faculties at Lund University. LUCA organizes since 2014 a local conference each year, LU Case Day, to share experiences and contribute to development of teaching and learning practices.
